## Update:(PUT

In this we will run both servers

- 1) angular on 4200 port
- 2) go server on 9090 port

make proxy.conf.json file and make proxy

```
{
  "/api/*": {
    "target": "http://localhost:9090",
    "secure": false,
    "pathRewrite": {"^/api" : ""},
    "changeOrigin": true,
    "loglevel": "debug"
  }
}
```

restart server

make production mode enable
